## NEWS RELEASE

FOR IMMEDIATE RELEASE

# ArrowSpan Announces Compatibility with Sputnik Control Center Service

**Santa Clara, Calif., Oct 18, 2007** – ArrowSpan Inc., a global provider of Wi-Fi mesh solutions, today announced its compatibility with Sputnik Control Center™ Pro and Standard, and the Sputnik Gateway™ 700. Sputnik Inc. is a leading provider of software as a service (SaaS) that allows wireless service providers to offer free and paid Wi-Fi services and manage them over the Internet.

The Sputnik Control Center solution provides a secure, web-based interface that lets wireless service providers remotely configure access points, create custom-branded captive portal pages, track usage, enforce network policies, generate reports, and bill for access. A single Sputnik Control Center server can manage one or hundreds of access points.

The Sputnik Gateway 700 runs Sputnik Agent Pro firmware and can authenticate hundreds of concurrent users. It enables multiple authentication methods, walled gardens, network policies, and support for prepaid cards, credit cards or PayPal billing.

“The compatibility between ArrowSpan’s mesh network and the Sputnik Control Center gives our customers a complete AAA solution using a third-party service,” said Max Lu, president and chief executive officer of ArrowSpan, Inc. “They now have the flexibility to offer free hotzones or paid services with their own branding.”

“Using Sputnik software with ArrowSpan mesh networks means more wireless service providers can provide branded Wi-Fi services that meet their unique business requirements,” said David LaDuke, Sputnik founder and CEO.

### **About Sputnik ([www.sputnik.com](http://www.sputnik.com))**

Sputnik Inc. (SPUT:OB) is a leading provider of software as a service (SaaS) that enables wireless service providers to build venue-branded, access-controlled Wi-Fi services and manage them over the Internet. Sputnik’s remote network and subscriber management features allow cost-effective operation in locations without onsite technical support. The company’s easy-to-use, flexible software supports a wide range of businesses, service providers, and educational

institutions, and has been adopted by customers in more than 100 countries around the world. The company is based in San Francisco.
